Enterprise Development Software

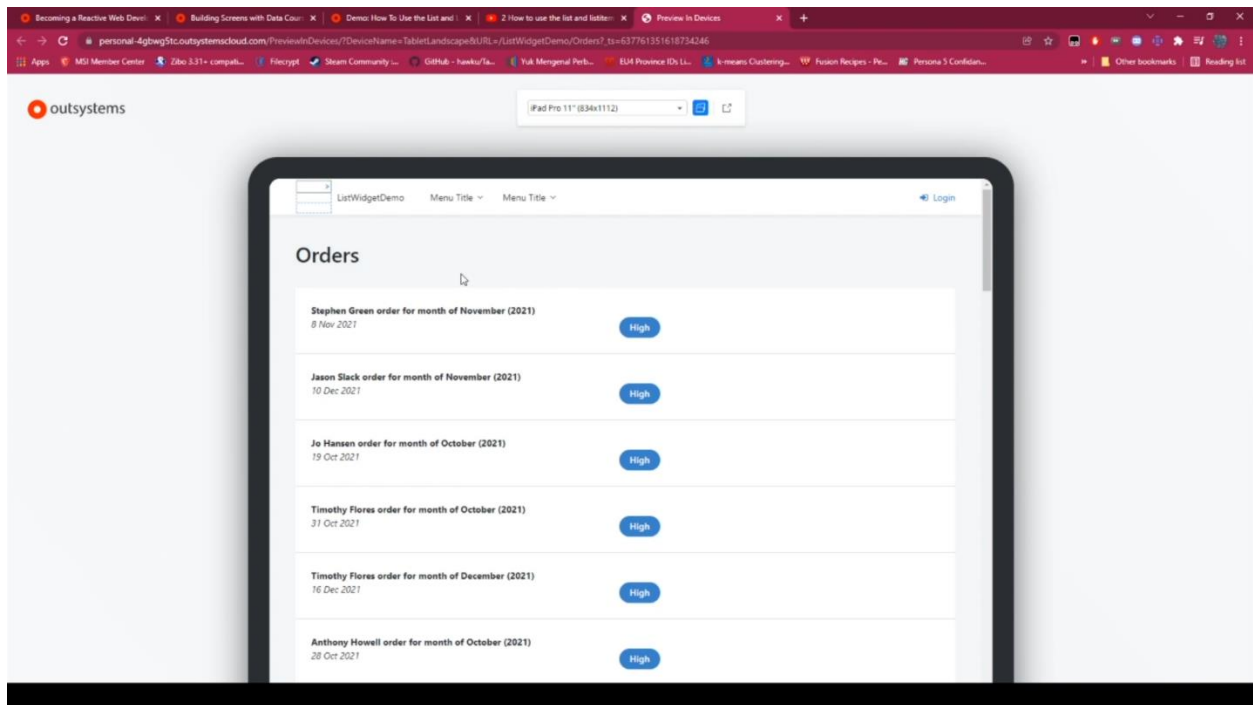

Path: Becoming a Reactive Web Developer

Topik 1: Building Screens with Data

Demo: Membuat List dan ListItem

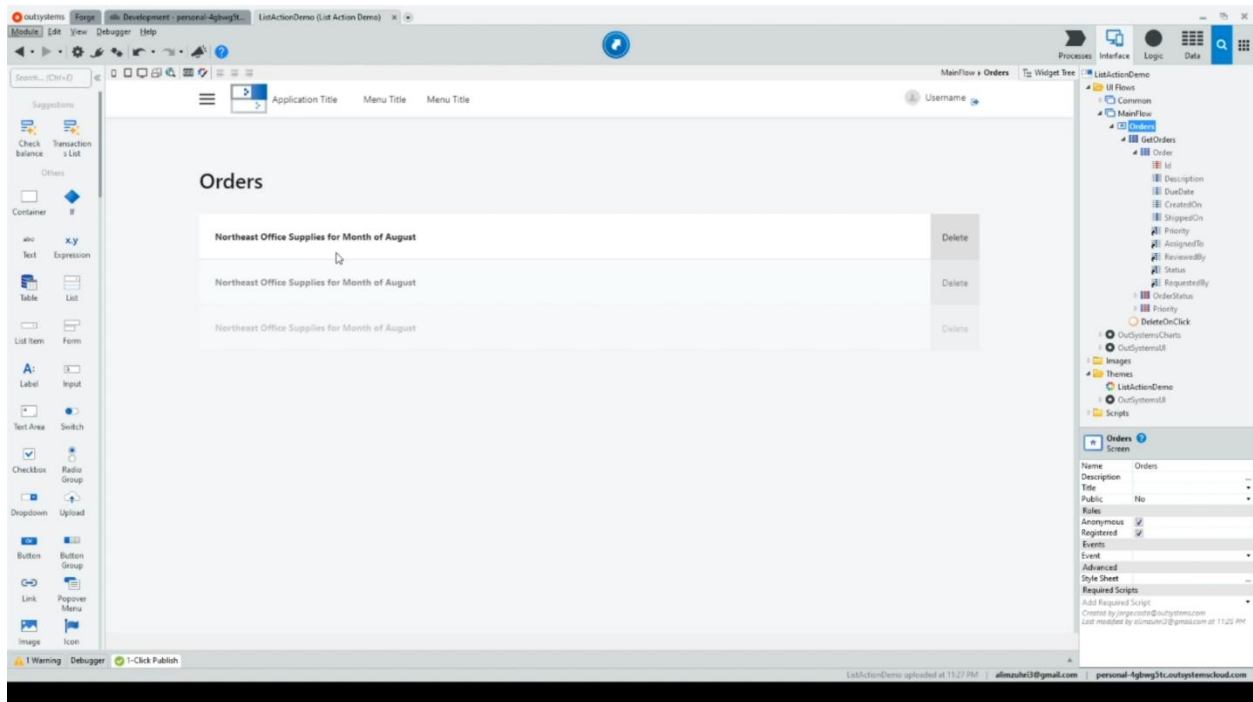

Menampilkan list order berdasarkan description, due date dan priority.

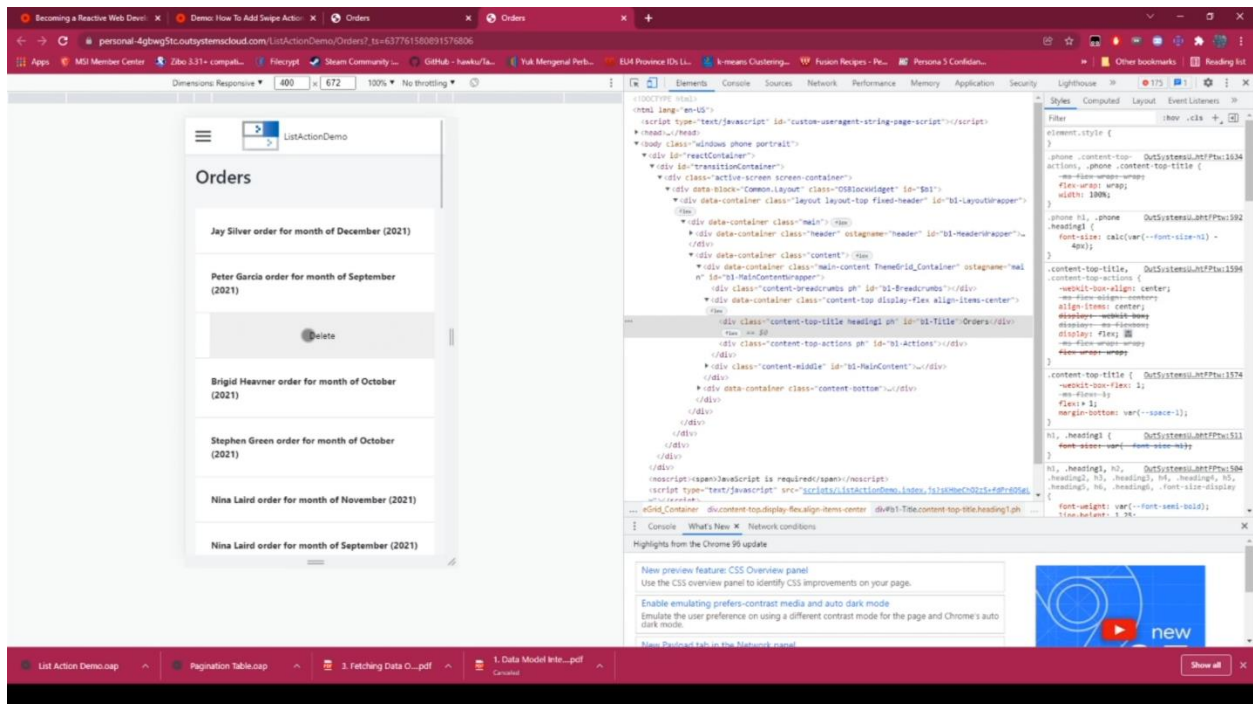

Demo: Bagaimana caranya menambahkan swipe action ke list

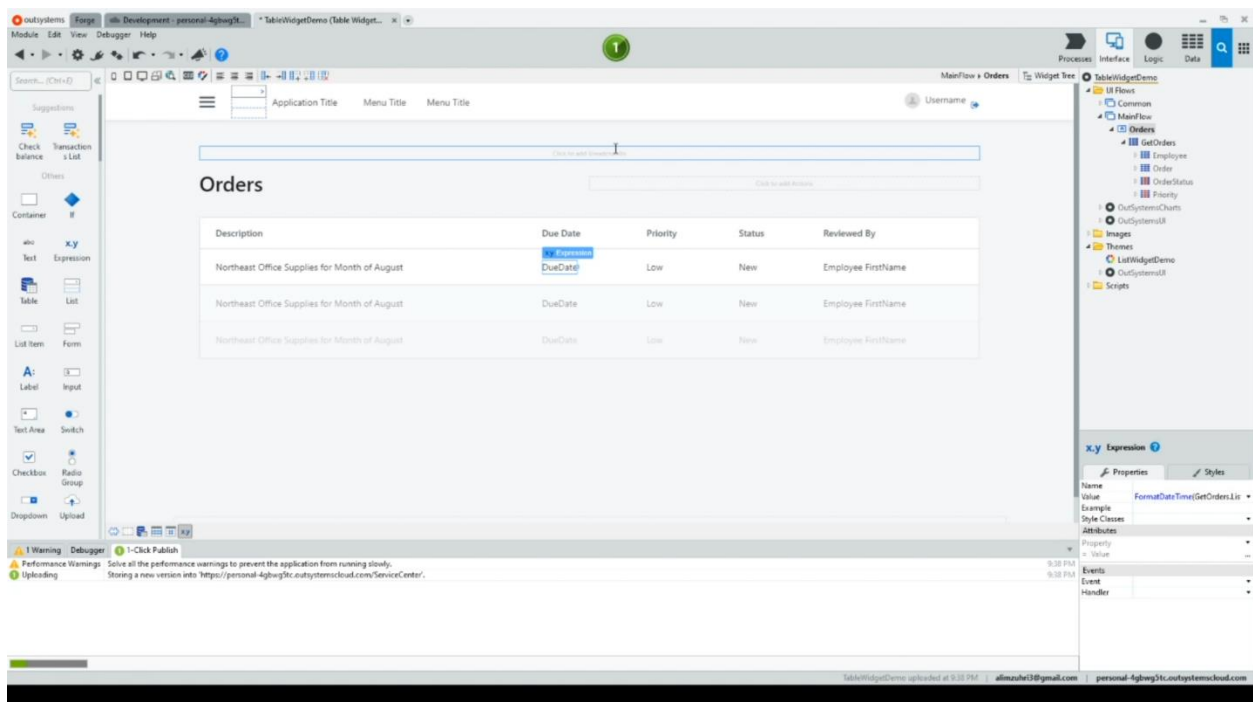

Data akan terhapus jika order di swipe, tetapi pada browser seperti chrome harus mengaktifkan developer tools dari inspect element untuk bisa menjalankan swipe.

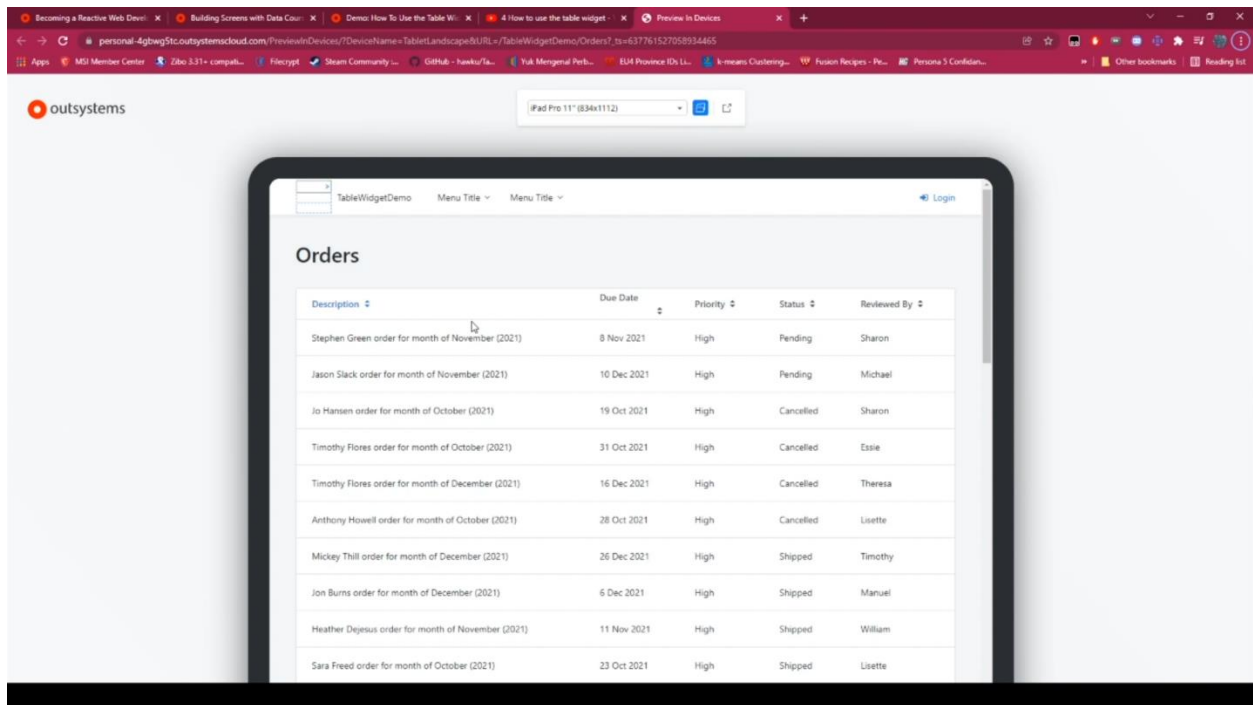

Demo: Bagaimana caranya menggunakan table widget

Menampilkan list dari order dengan kolom yang didefinisikan yaitu description, due date, priority, status dan reviewed by.

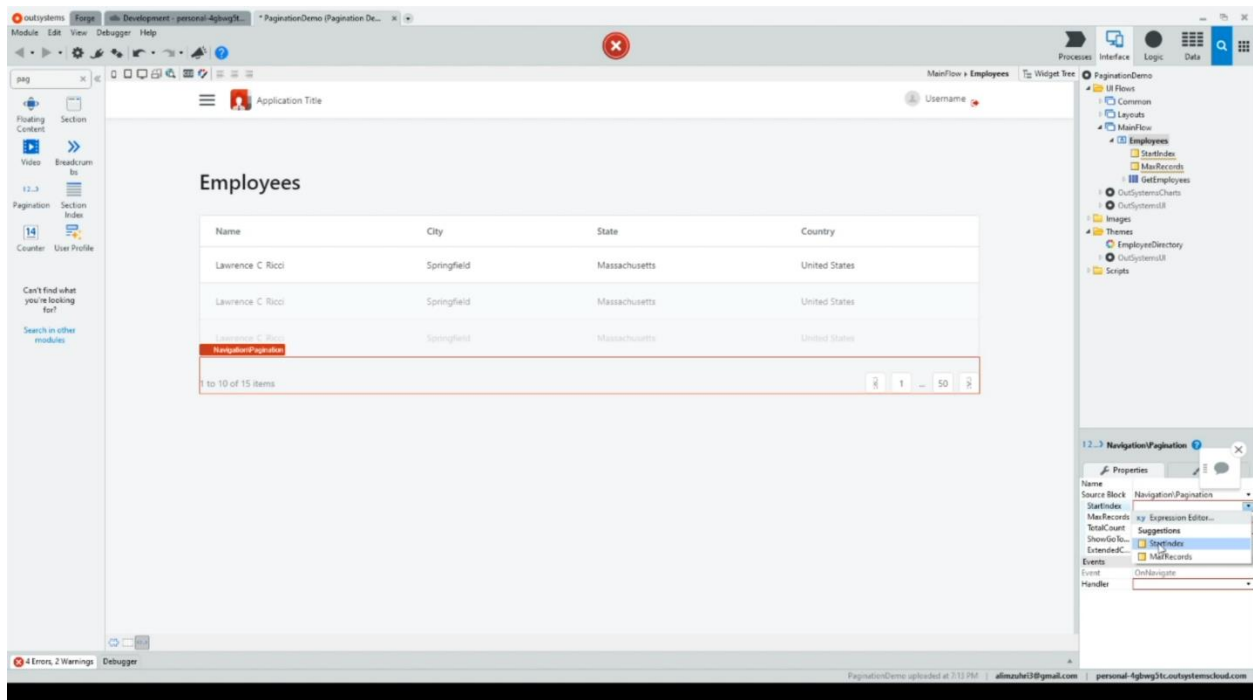

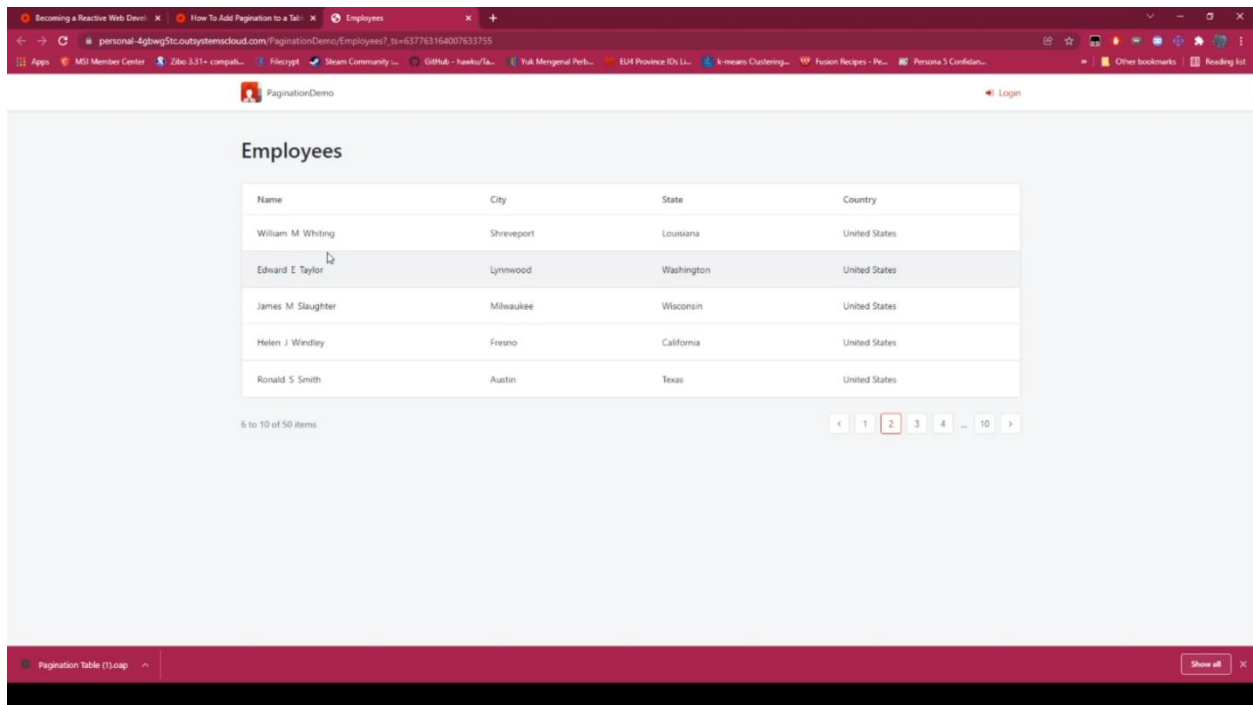

Topik 2 Pagination dan Sorting

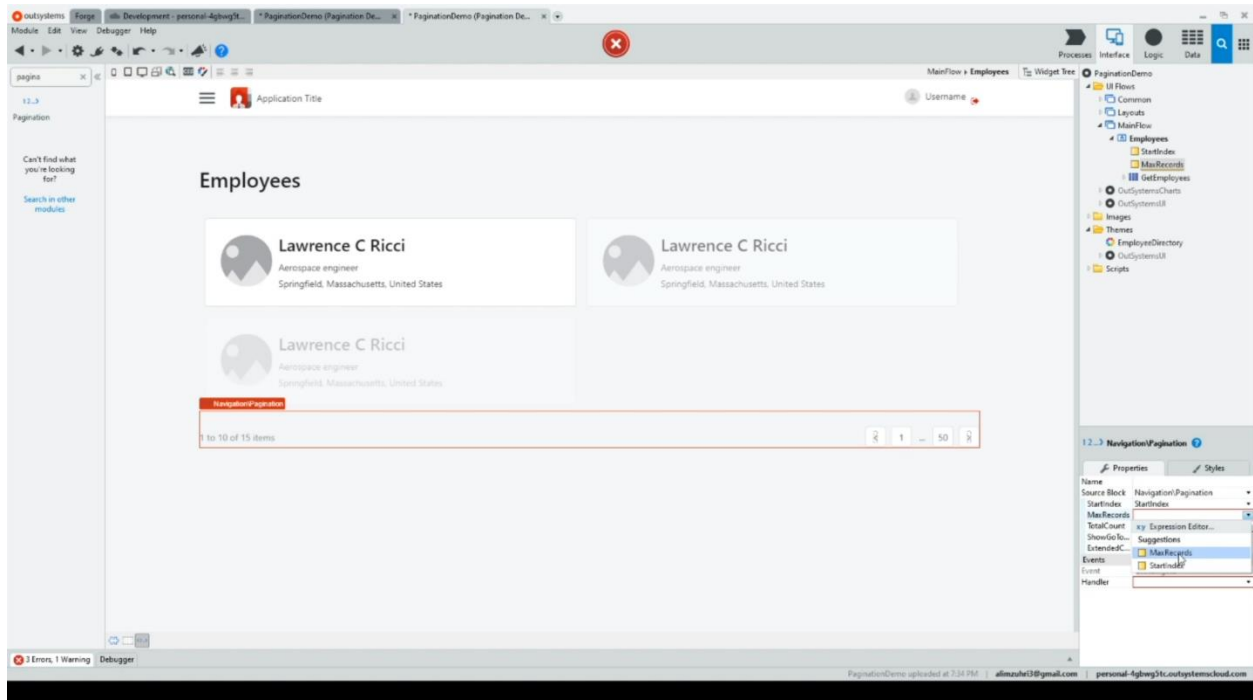

Demo: Menambahkan pagination ke table

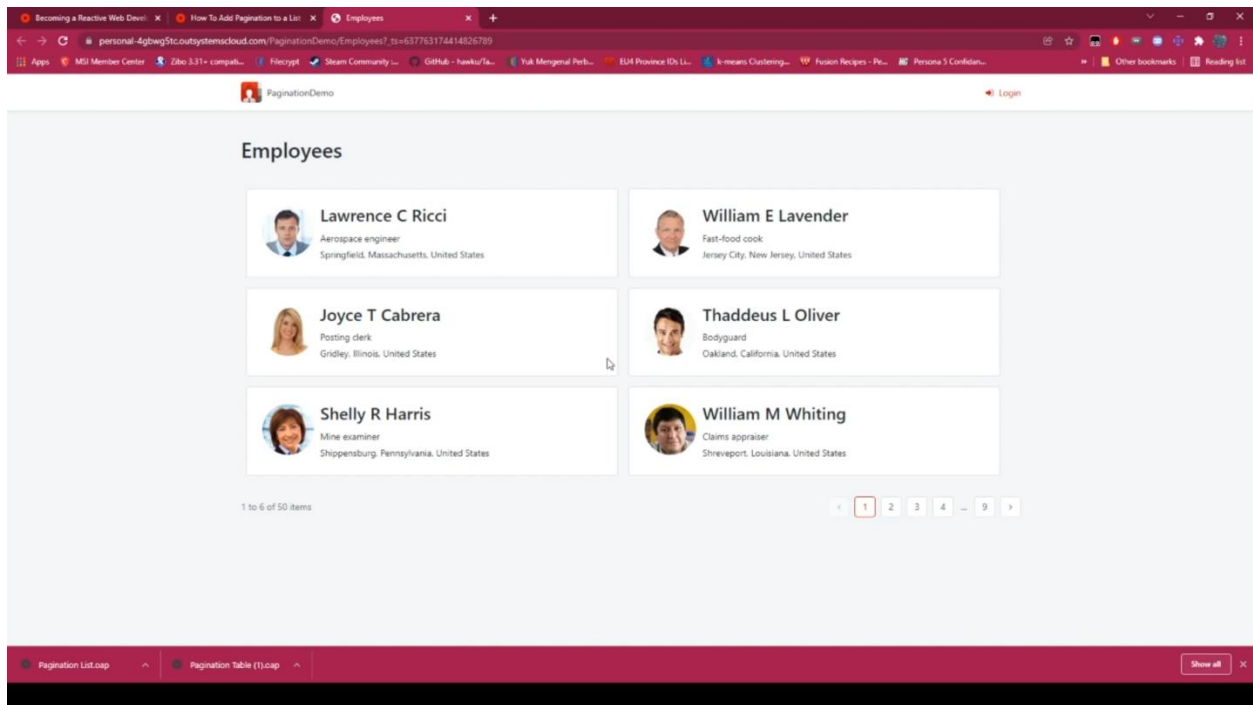

Jika pagination diklik akan mengarah ke tampilan lain yang menampilkan 5 record per masing-masing tampilan.

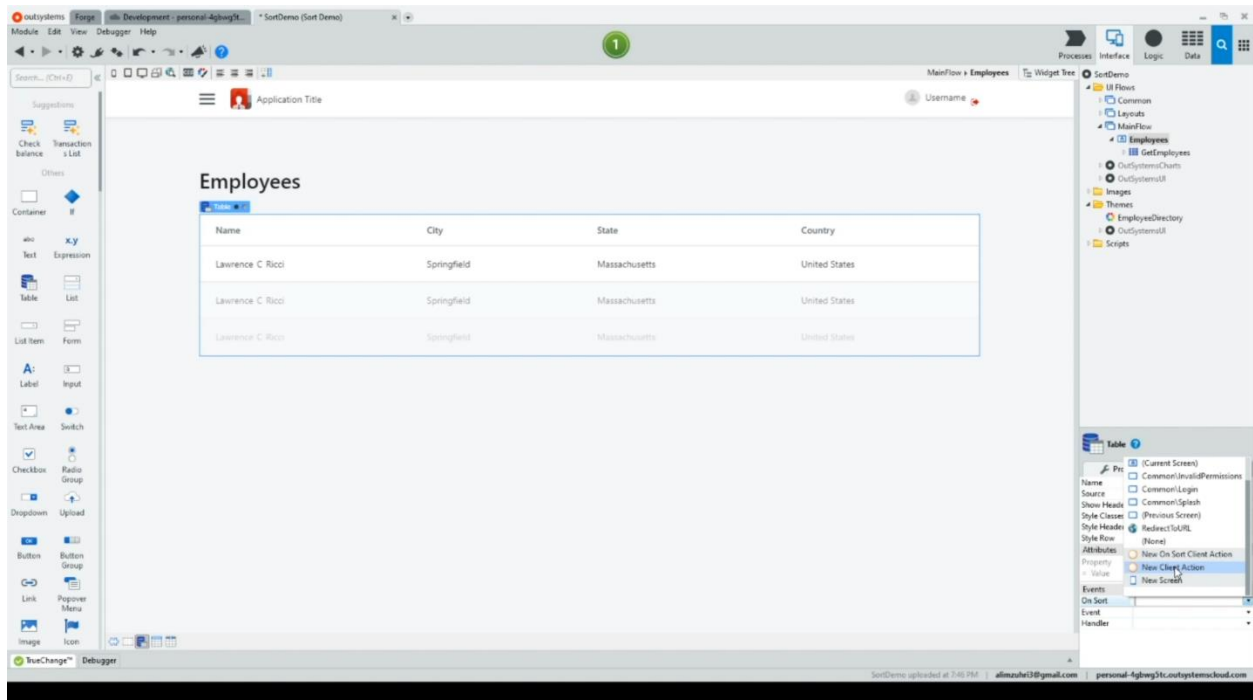

Demo: Menambahkan pagination ke list records

Demo: Menambahkan sorting ke table

Membuat sorting ke dalam table, jika header cell diklik, contohnya pada kolom header city akan men ascending atau descending records.
